SIG Mission:

To provide a forum for COATD members to share and learn best practices and trends in technology that supports talent development.

Introductions:

Your name, what you do, tell us about a course you recently took or built:

- **Ashley Thirtyacre** – Instructional Designer @ OSUWMC – Ashley has a eLearning Pinterest Board she draws for inspiration on occasion (a bit outdated but added to on occasion): pinterest.com/goseae/eLearning-course-examples/   or pinterest.com/goseae/instructional-design-and-technology
- **Caleb McKoy** – Revlocal – Welcome Caleb – cyber security 2-3 minute trainings and videos
- **Dawn Snyder** – Dawn Snyder Associates – Phishing course
- **Dick Pfister** – Learning + Performance, curation @ Nationwide – How to walk through Death Claim (Murder Mystery theme)
- **Joe Windham** – Instructional Designer @ semi-retired – simulation assessment for call center personnel
- **Karen Nemcek** – Alearna – was a Chemistry major and evolved into eLearning and animation
- **Kevin Reagh** – Huntington National Bank – trivia game with feedback remediation and created some competition | another was Compliance Training for Board of Directors
- **Lisa Poulin** – Konecranes – A Drug Compliance course
- **Madeline Fix**
- **Ned Parks** – Aegis 360 Consulting – early experience in 3x5 floppy training | New instructor led (group) scenario challenges with instant feedback (delivered via Zoom)
- **Randy Meredith -**
- **Roger Norfleet** – Instructional Designer @ Wendy's – Learning How to Drive a Bus (CCAF style course)
- **Russell Cotter** – Product Manager @ Chase – short eLearning should be simple, engaging, and visual
- **Sarah Esala** – Worthington Libraries – Project Ready
- **Todd Remer** -- ID + Elearning Consultant @ Nationwide – Power Sports

NEWS:

You must be a member of COATD to attend all meetings. In addition, you should RSVP for each meeting on the COATD website before attending. Email reminders are automated from COATD web. Text Messaging (New Feature) – check out the website

Next Technology SIG: **TUESDAY, May 25** (7:30-9 am)

Thank you in advance for updating your user profile at the COATD website! Also—save the date for the conference: September 21, 2021.

SIG NOTES:

Skill Share

- Do you think sharing would be helpful for short 10-15 min of our meetings? What skill would you be willing to share? When you have a moment, please email me at lisapoulin5@gmail.com
    - Ned just needs 25 minutes to teach Mind Mapping

Storyline Course

- Is there an easy way to take a game in LMS and take course and make web-accessible item with all elements built in? (Multiple characters and interactions) | Discussion:

- If talking Articulate Rise, the process is fairly seamless and you can import a Storyline Project into a Rise course.
- In Storyline, there is a "Publish to Web" feature that might be helpful as well.
- Additional option to publish as FTP and this creates a folder structure that can then be uploaded to the web.
- Keep in mind, website wasn't trackable and had to have groups sign waivers that the training was completed.

Which Development Tools

- Which tools is best to spend time in as diving into Instructional Design? | Discussion:
  - Articulate Rise (easiest learning curve with basic functionality) is great for ease with focus primarily on Text, Videos, and some interaction. Articulate Storyline is typically the most common for with a slight learning curve (an advanced PowerPoint feel) yet allows for complex interaction capabilities. Articulate has a great free community to learn: https://community.articulate.com/ ; https://blogs.articulate.com/rapid-elearning/
    - Storyline's new modern player is more responsive but limited to just black or white players.
  - Captivate is another option that has a slight learning curve with some complex interaction capabilities.
  - Lectora is typically the most complex (larger learning curve) but you can do just about anything. Kevin's personal experience is Lectora fixes a few things with their upgrades but breaks one in the process typically.
  - Other tools: Canva, Vyond, Camtasia; Piktochart; Mentimeter; WeVideo
- Installing Fonts into Articulate Rise
  - People have had experience with installing Google Fonts
  - https://articulate.com/support/article/Rise-Adding-and-Managing-Custom-Fonts

When a SME gives you a giant book of content and want's a 15 minute eLearning, where do you start?

- Mind Map; Outline; Objectives; always start with the end in mind
  - Mind map is better on flipcharts or whiteboards compared to electronic as electronic has limited space and studies show it has at times limited ideas compared to flipcharts or whiteboards.
- What does the learner actually need to know? Karen also often takes the existing training to get a feel for what is actually currently being given.

Next Meeting Ideas:

- Russell likes to listen to podcasts, TedTalk, etc while walking – ideas of how to learn something while you are walking. It would be awesome to take a course while walking vs just sitting at your desk.
- Best Practices with Microsoft Teams
- Best Practices on Virtual Trainings (particularly with use of Zoom)
